

Environmental Protection at Zentro-Elektrik

Our company and its employees place great emphasis on the subject of environmental protection.

Together we are committed to treating all natural resources sparingly and carefully, and to avoiding any impact on the environment or keeping it to a minimum.

The following environmental guidelines underline our responsibility towards active environmental protection in our operations, in relation to our products and in society.

Operational environmental protection to us means:

- Taking a responsible approach towards energy, raw materials and water
- Minimising waste, residual materials and emissions
- Making sure recyclable materials are re-used
- Substituting materials which have an environmental impact
- Environmentally friendly disposal of pollutants
- Regular maintenance of our equipment to prevent risks to people and the environment

Product related environmental protection to us means:

- Environmentally aware product planning as well as environmentally aware design, starting in development
- When selecting raw materials and components for our appliances we take into account long service life and a high level of efficiency
- We take into account environmentally friendly production procedures and finishing processes
- Compliance with all substance restrictions in accordance with RoHS Guidelines from 1 July 2006

Environmental protection for society to us means:

- In all areas of life we want to act in a way that preserves and respects mankind and nature
